

BUSINESS & COMPANY PROFILE

Marine, Engineering & Procurement Services for Nigeria's Oil & Gas Industry

An indigenous logistics and engineering partner operating swamp to deep offshore — from Port Harcourt, Lagos and Houston.

WHO WE ARE

One of the foremost indigenous service companies in Nigeria's oil and gas industry.

Gasstocks Limited was established in 2008 to provide quality marine, engineering and procurement services to Nigeria's oil and gas industry, and is managed by a team of Nigerian and foreign professionals with decades of experience across the global financial and energy sectors.

We offer bespoke marine, transportation and logistics, instrumentation and control automation, and engineering and procurement services to clients at their on-shore and off-shore locations, supporting their drive for efficient operation and maximum profitability. All services are covered by the necessary permits from industry regulatory agencies. In line with our vision of becoming a major player in Nigeria's oil and gas industry, we continue to pursue emerging opportunities in the country's swamp and deep offshore exploration and production, seeking strategic partners who share our commitment to local content and to the protection of the environment.

2008 YEAR ESTABLISHED	RC 359117 REGISTERED IN NIGERIA	₦25m AUTHORISED SHARE CAPITAL	3 OFFICES — PH, LAGOS, HOUSTON

WHAT WE WANT TO BECOME & OUR PURPOSE

What we want to become

To be the leading service provider of first choice in our market segment.

We remain focused on functional execution with a trained workforce backed by a highly professional management team. We continually rise to our industry's challenges by providing the latest high-quality products and services available in the technology market, coupled with timely execution of projects at competitive prices, through an integrated network of linkages across the global supply chain.

Our purpose

To provide optimised, professional and efficient services that maximise returns on our clients' operations, while remaining economically sustainable and socially responsible.

We are consistent in our commitment to our stakeholders — client, community and employee alike. We remain abreast of current trends, local and global, recognising the ever-increasing significance of technology as a component of value in our products and services, and never relent in our resolve to provide excellence in service.

Discipline

Structure and financial discipline across every engagement, from bank obligations to fleet maintenance.

Timeliness

Projects executed within timeline and budget, backed by a short turnaround on client feedback.

Responsibility

Local content, community relations and environmental protection built into how we operate.

Nigeria's Niger Delta, and the case for an indigenous partner.

Nigeria is one of the world's leading oil producing nations, and exploration and production activities account for the large majority of the country's annual national income. About 70% of Nigeria's crude oil and gas production comes from the Niger Delta — a coastal belt of swamps and one of the world's largest arcuate river deltas, its riverine communities scattered along interconnected creeks and distributaries of the River Niger.

Oil exported from the region to the United States and to Asia has kept international attention on Nigeria as a key supplier, and local and international security efforts are continually deployed to protect exploration and production activity. To promote sustainable development in the oil-producing Niger Delta, the participation of indigenous companies in Nigeria's oil and gas industry is actively encouraged — a policy that has driven steady growth in the number of local companies in the sector.

One of the few Nigerian companies taking advantage of this opportunity, providing services adaptive to the Niger Delta and existing International Oil Companies.

WHAT WE DO

Swamp logistics to deep offshore —

PORT TO PORT

logistics without limits.

25 services, four capability groups.

In line with existing regulations, Gasstocks Limited holds permits from Nigeria's petroleum resources regulator empowering us to offer services across four capability groups to the oil and gas industry — set out here, and in full over the pages that follow.

01 — Marine & Logistics

Vessels, crews and security, on location at short notice.

Gasstocks owns several classes of marine vessels and works with key vessel owners, so houseboats, tugs, crew boats, barges and security vessels can be on location at short notice — for swamp, shallow-water and deep offshore operations.

Vessel charter & management

Fleet management

Marine transportation

Offshore project logistics

Marine security & escort

Marine catering

03 — Instrumentation & Control Automation

Systems installed, calibrated and kept live.

Analytical, control, safety and metering systems — procured, supplied, installed, commissioned, calibrated and then maintained, with control and automation specialists available to your team.

Control & safety systems

Metering systems

Calibration & certification

Post-installation maintenance

02 — Mechanical & Civil Engineering

Pipelines to bridges, designed and built to timeline.

Pipelines and flowlines, subsea equipment installation, fabrication, piling, jetties, roads and bridges — designed and delivered to timeline and budget, with sister companies for civil works.

Pipeline & flowline construction

Fabrication & boatbuilding

Piling & foundations

Jetty construction

Roads & bridges

04 — Procurement, Leasing & Manpower

Materials, equipment and manpower, sourced and delivered.

Piping, wellhead, instrumentation and mechanical materials sourced through logistics bases in Houston, London, Belgium, India, China and Hong Kong; heavy equipment on lease; and the specialists to run it.

Marine procurement & supply

Heavy equipment leasing

Specialised manpower

Warehousing

"Our offering consists of several classes of services to Nigeria's oil and gas industry."

GASSTOCKS LIMITED

Vessels, crews and security, on location at short notice.

Gasstocks owns several classes of marine vessels and holds strategic working relationships with key vessel owners, giving access to additional tonnage at short notice and at competitive prices — for swamp, shallow-water and deep offshore operations.

Swamp & deep offshore logistics

Complete marine logistics spreads — houseboats, tugs, crew boats, catering, diesel, potable water, waste disposal and security escort — for pipeline, wellhead and field operations.

Vessel charter & management

Owned vessels and fast access to key owners' fleets: crew boats, tugboats, houseboats, hovercraft, PSVs, AHTS, CSVs and diving support vessels.

Fleet management

Day-to-day technical and operational management of chartered and owned vessels, from crewing to maintenance scheduling.

Vessel mobilisation & demobilisation

Pre-hire inspection, class and insurance certification, and clean demobilisation at contract close.

Offshore project logistics

Marine-led logistics planning and execution for offshore projects, from mobilisation through to project close-out.

Marine transportation

Movement of cargo, equipment and personnel across swamp, shallow-water and deep offshore routes.

Barges & offshore heavy equipment

Lay, fuel, ramp, dump and jack-up barges, offshore heavy-duty equipment and crane services.

Offshore supply & support

Supply-vessel runs and standby support to offshore installations and platforms.

Marine security, surveillance & escort

Security personnel, pipeline surveillance and armed escort. Licensed Private Guard Maritime Company (NSCDC/PG/015/000697), with Navy and Army gunboats on call.

Bunkering, fresh water & chandelling

Vessel bunkering, fresh water at sea and in difficult riverine terrain, and ship chandelling, as supplied to SPDC East and West.

Marine catering & accommodation

Houseboats and accommodation barges with first-class offshore catering, delivered with Courdeau Catering.

02 — MECHANICAL & CIVIL ENGINEERING

Pipelines to bridges, designed and built to timeline.

Pipelines and flowlines, subsea equipment installation, fabrication, piling, jetties, roads and bridges — designed and delivered to timeline and budget, with sister companies for civil works. Analytical, control, safety and metering systems are procured, installed, commissioned and kept calibrated by our instrumentation team below.

Pipeline & flowline construction

Construction of pipelines and flowlines, modification of gas flowlines, and subsea heavy-duty equipment construction and installation.

Steel fabrication & boatbuilding

Fabrication of steel structures and pressure vessels, and construction of barges, houseboats and shallow-water crew boats.

Facility maintenance & upgrades

Maintenance of pipelines, storage facilities and heat exchangers, plus environmental and safety upgrades of crude production facilities.

Engineering design & project management

Bespoke engineering design, project management, technical sales and support engineering for project-based procurement.

Piling & foundations

Design and execution of piling projects with our sister companies.

Jetty construction

Design and construction of jetties, delivered to timeline and budget.

Roads & bridges

Design and construction of roads and bridges, including access routes to riverine and terminal sites.

Dredging & land reclamation

Dredging and reclamation works, and the marine support spread around them, as delivered for SPDC at Tunu Wells 3 and 5.

03 — INSTRUMENTATION & CONTROL AUTOMATION

Control & safety systems

Procurement, supply, installation and commissioning of analytical, control and safety systems.

Metering systems

Supply, installation and commissioning of metering and measurement systems.

Calibration & certification

Calibration and certification of measurement systems.

Post-installation maintenance

Maintenance and sustenance of installed systems so they keep delivering value after commissioning.

Control & automation specialists

Control and automation specialist manpower for oil and gas operators in Nigeria.

Led by 41 years of project delivery

Our technical management team is led by an expatriate engineer with over 41 years of experience delivering engineering projects, including Nigerdock.

Calibration and certification, in-house

We calibrate and certify measurement systems, and our post-installation maintenance keeps them delivering value long after handover.

EQUIPMENT & FLEET

Owned and accessible equipment, sized to the job.

River tugboats

500 hp, 800 hp and 1,000 hp

Ocean tugboats

30, 40 and 50 bhp classes

Ramp barges

500 t, 800 t and 1,000 t

Dump barges

500 t to 1,500 t

Passenger crew boats

40, 50 and 60 seats · 20–25 knots

Houseboats

40-, 60- and 80-man, with catering & hotel services

Security vessels & gunboats

Manned by the Nigerian Navy, Army and Police

Patrol boats

15 passengers · 25 knots

Fast crew / patrol vessels

Accommodation for 10–15 · 25 knots

Hovercraft

12 persons · 50 km/h

Fast supply vessel

64 passengers, 18 berths · 20 knots

DP3 offshore construction vessel

ROV, 40 t crane, helideck, 140 persons

Cranes

30 t, 50 t, 60 t and 80 t

13

CLASSES OF VESSELS & EQUIPMENT

1,500t

LARGEST DUMP BARGE CAPACITY

140

PERSONS — DP3 CONSTRUCTION VESSEL

A one-stop A-Z solution for marine-related logistics.

Procurement services

Piping materials & wellhead — line pipes, pipe fittings, tubing, connectors, seal rings, valves and christmas trees, choke valves, shut-off valves, heavy-duty umbilical hoses.

Instrumentation — actuators, control panels, pressure gauges and transmitters, testers, analysers, instrumentation valves.

Manifold — fittings, connectors, plugs.

Mechanical — heat exchangers, pumps (hydraulic, metering), plates, beams, gratings.

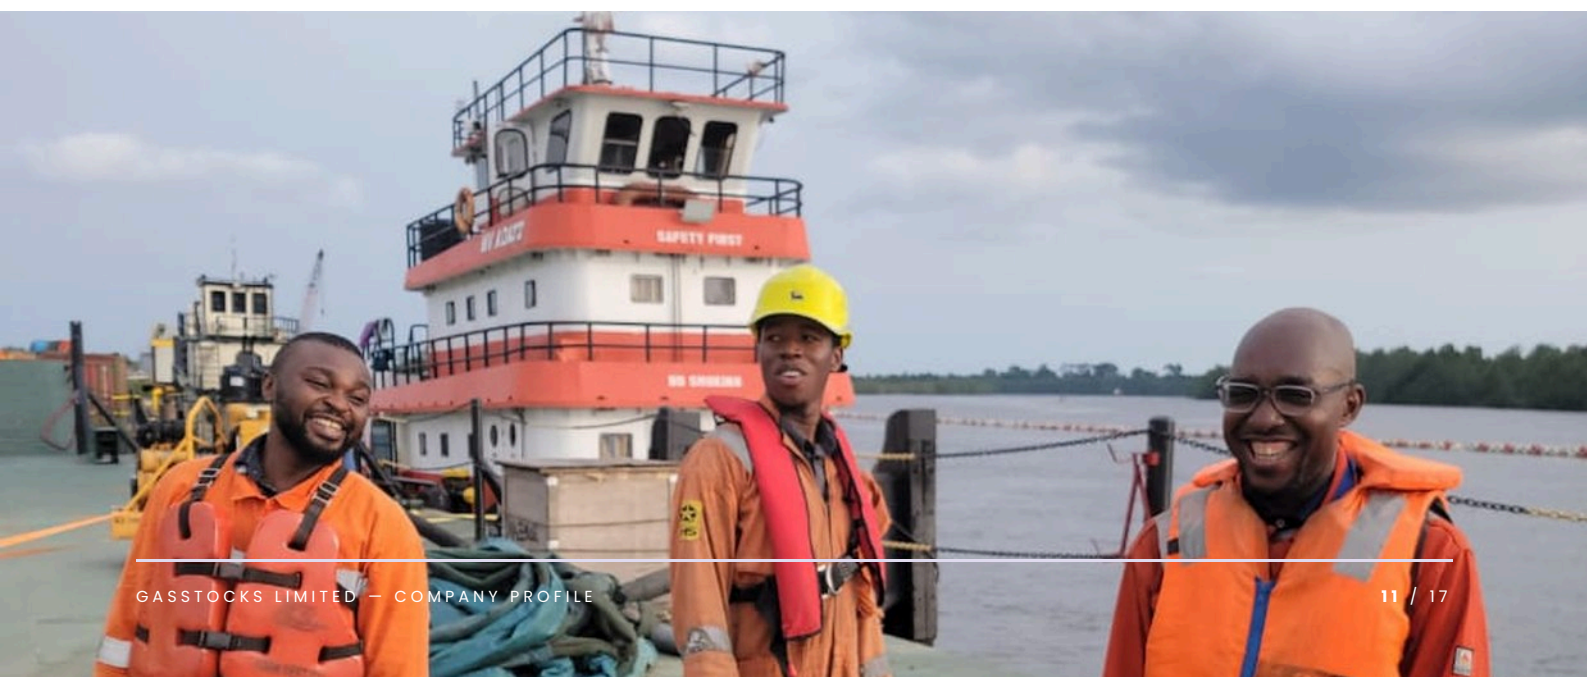

Equipment leasing & specialised manpower

We lease heavy-duty marine and engineering construction equipment for land, swamp and deep offshore operations — including remote operated vehicles (ROVs), cranes of various sizes and swamp buggies to production platforms — and provide the specialised manpower to operate them, bridging expert engineering and other manpower gaps in the industry.

Warehousing & gas supply

Warehousing — permitted storage to support procurement and in-country logistics, keeping materials moving between our overseas bases and client sites.

LPG & industrial gases — supply and distribution to industrial and commercial customers.

LOCATION

Three groups of locations, to meet our clients where they operate.

Logistics bases

Operated with strategic partners, giving in-country and overseas reach.

- Port Harcourt
- Lagos
- Warri
- Houston
- India
- China
- Hong Kong
- London
- Belgium

Office locations

Gasstocks Limited — Port Harcourt and Lagos coordinate in-country logistics.

Gasstocks Inc. — our Houston subsidiary coordinates overseas cargo, associated logistics and strategic partnerships that strengthen our engineering portfolio.

Ability to access funding

Gasstocks has maintained a healthy risk-asset portfolio with its bankers, who have continuously and remain willing to meet its credit needs — a value-adding intangible asset that ensures customer needs are met promptly.

Operational jetties & fabrication yards

Brawal Shipping Jetty, Onne FTZ
 Starzs Marine & Engineering Jetty, FOT Onne
 Premier Logistics Base (former Panalpina), Onne
 El-Toutoma Jetty, Woji, Port Harcourt
 Akpos Jetty, Abuloma, Port Harcourt
 Hollyfield Jetty, Elemenwo Bypass, Port Harcourt
 Tecon Jetty, Trans Amadi, Port Harcourt

Mabisel Jetty, Trans Amadi, Port Harcourt
 Multiplan Jetty, Abuloma, Port Harcourt
 PW Jetty, Abuloma, Port Harcourt
 Lumbert Jetty, Trans Amadi
 Nest Oil Jetty
 Graham Petroserve Jetty, Warri
 LADOL Deep Offshore Logistics Base, Lagos

Steady hands, decades of sector experience.

Sir Emmanuel Okene

KSGG · KSJI — CHIEF EXECUTIVE OFFICER

Emmanuel Okene leads Gasstocks Limited and its Houston subsidiary, Gasstocks Inc., based in Texas. Under his leadership, Gasstocks has become a marine logistics and engineering partner to Shell, Eroton and other Niger Delta operators, drawing on a wide network of industry professionals and professionally run companies to deliver project outcomes.

He previously served as Oil Services Head (South) at UBA Group, bringing extensive financial and operational expertise to the oil and gas sector, and holds a Master of Business Administration from the University of Benin and a Master of Science from Queen Mary, University of London.

Our technical management team is led by an expatriate technical director with over four decades of experience delivering engineering projects, including the delivery of Nigerdock — a depth of hands-on capability that underwrites every marine and engineering assignment we take on.

OUR COMPETITIVE ADVANTAGE

Structure and discipline, in a business that rewards both.

- 1 Structure and discipline are key success factors in our business, giving us an advantage over our peers.
- 2 We channel resources to the right place at the right time, and have consistently repaid bank financing without requesting waivers.
- 3 Every asset in our pool is kept in top shape through a strict maintenance culture, combined with a short turnaround on customer feedback.
- 4 Lean management reduces project cost for our clients, without compromise on delivery.
- 5 We are licensed as a Private Guard Maritime Company (NSCDC/PG/015/000697), with Nigerian Navy and Army support available for maritime security at short notice.
- 6 Our fleet carries GPS tracking and effective communications, with continuing investment in real-time operational software.
- 7 Vessels are insured by Cornerstone Insurance Plc for marine hull, public liability and group life.
- 8 All staff, spouses and up to four children are covered under our health insurance scheme with Wellness Health Management Services.

ACCREDITATIONS

"Structure and discipline are key success factors in our business, and give us competitive advantage amongst our peers."

OUR COMPETITIVE ADVANTAGE

OUR CLIENTS

Rethink safety and service.

and government
security agency
partners

"Our operations conform to international standards, as reflected in our yearly certification by the relevant regulatory bodies."

OUR CLIENTS

Selected track record – SPDC & Eroton E&P.

PERIOD	CLIENT / CONTRACT	SCOPE
2004 – 2007	SPDC – Oloma Pipeline	Crew boat for offshore pipeline surveillance operations
2005 – 2007	SPDC – B-Nag / Oloma Pipeline	Crew boat and catering services for pipeline surveillance
2007 – 2009	SPDC – Krakama location	Provision of accommodation vessel
2007 – 2009	SPDC – Cawthorne Channel	Houseboat and catering for pipeline surveillance
2008 – 2010	SPDC – Cawthorne Channel flow station	Crew boat and accommodation barge
2008 – 2010	SPDC – Krakama flow station	Crew boat, accommodation barge and catering
2017 – 2019	SPDC – Pipeline maintenance, Patrick Waterside	Full marine logistics spread*
2018 – 2019	SPDC – Dredging, Tunu Well 3 / Kanbo	Full marine logistics spread*
2018 – 2019	SPDC – Dredging, Tunu Well 5	Full marine logistics spread*
2018 –	SPDC – Wellhead maintenance & wireline, Soku	Full marine logistics spread*
2018 –	SPDC – Wellhead maintenance, Odimodi / Ogbotobo	Full marine logistics spread*
2019 – 2021	SPDC – Dodo North field security support	Full marine logistics spread*
2018 –	Eroton E&P – Akaso field workover, Cawthorne Channel	Houseboat, tugboat and ancillary services
2018 –	Eroton E&P – Akaso field workover, Cawthorne Channel	Tugboat fuel and security service

*Full marine logistics spread: houseboats, tugboats, crew boats, catering, diesel (AGO), potable water, waste disposal and security escort.
